

CLAIMS

(for easy understanding, numerals are added to some claims)

What is claimed is:

1. (currently amended) A mop, comprising:

a long handle (, the long handle having an upper handle, a bow portion, and a lower handle, each of them having two ends, one end of the bow portion connects to a lower end of the upper handle and another end of the bow portion connects to an upper end of the lower handle); and

a bow portion, the bow portion formed by a part of the long handle in /or near middle of the long handle and as a consistent part of the long handle; and

a mass of absorbent material, the mass of absorbent material being fixed on the lower end of the (lower) long handle.

2. (currently amended) The mop of claim 1, further comprising means for twisting the mass of absorbent material(a twisting part with an extension twisting handle).

3. canceled.

4. (currently amended) The mop of claim (3) 2, wherein a bow holder is disposed on the bow for easily turning.

5. (currently amended) The mop of claim (3) 2, wherein a control button is disposed on the lower handle, whereby, the control button is pushed to release the twisting part.

6. canceled.

7. (new) The mop of claim 2, wherein the twisting means is a sleeve (# 8) holds another end of the mass of absorbent material, the sleeve having a twisting handle (#10), the sleeve can be moved on the lower handle (# 7).

8. (new) The mop of claim 2, wherein the twisting means is an absorbent material holder (# 36) holds the mass of absorbent material, the holder connected to one end of main bar (#33), and an extension bar (#31) connected to another end of the main bar, one hole (#16) disposed on the long handle, the main bar pass through the hole and the first holder (# 6).

9. (new) The mop of claim 2, wherein the twisting means is a big sleeve (#40) with multiple wing pieces (#45) having a twisting handle (#10), the big sleeve can be moved on the lower handle .
